

PRESS RELEASE

HEADLINE: SOLAR SAVVY SOLUTIONS ANNOUNCES PARTNERSHIP WITH TOUCHSTONE LIVING TO DEVELOP NEVADA'S FIRST SMART SOLAR COMMUNITIES

Henderson, Nev., November 2025 – Solar Savvy Solutions today announced a major partnership with Touchstone Living to integrate advanced clean-energy technology into a new generation of smart homes across Southern Nevada.

Henderson, Nev., November 2025 – Solar Savvy Solutions today announced a major partnership with Touchstone Living to integrate advanced clean-energy technology into a new generation of smart homes across Southern Nevada. The first collaboration, a groundbreaking community called The Solaris, is set to begin development in Henderson and will feature homes equipped with integrated solar panels, energy-efficient smart appliances, in-home energy storage units, and EV charging systems.

The Solaris marks the beginning of a long-term initiative between the two companies aimed at making sustainable living more accessible and affordable for Nevada residents. Additional communities are expected to enter development in 2026, aligning with the region's rapid population growth and demand for energy-efficient housing. [1] Quote: "Homeowners deserve living spaces that not only look beautiful but also reduce energy costs and environmental impact," said Elena Carter, CEO of Solar Savvy Solutions. "Our partnership with Touchstone Living represents a shared commitment to innovation, sustainability, and the future of smart residential development in Nevada." The Solaris community is being designed as a model for future smart-home neighborhoods nationwide, showcasing how renewable energy systems can be incorporated seamlessly into everyday living.

The Solaris community is being designed as a model for future smart-home neighborhoods nationwide, showcasing how renewable energy systems can be incorporated seamlessly into everyday living.

Features of the homes will include:

- Rooftop solar arrays designed for maximum efficiency
- Smart thermostats, lighting, and appliances
- In-home battery storage to offset peak energy rates
- Level-2 EV chargers installed in every garage
- Real-time energy monitoring through an integrated mobile app
